

GOPINATH P

Software Engineer | Frontend Expert • Scalable Systems & SaaS

p.gopinath.work@gmail.com | +91 6369326257 | linkedin.com/in/p-gopinath | gopicraft.dev | github.com/Gopi-p

PROFESSIONAL SUMMARY

Software Engineer with 5 years of experience building scalable SaaS applications and performance-critical frontend systems using Angular. Strong understanding of backend systems including API design, database schema modeling, and query optimization, with a focus on designing scalable application architecture. Worked on SaaS platforms involving real-world business workflows and large-scale data handling.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, RxJS, PrimeNG, TailwindCSS, Fabric.js, Flutter

Backend & Tools: Node.js, MongoDB, GraphQL, REST APIs, AWS (S3), Microservices, Firebase, Docker, Git

Familiar: SQL, Unit Testing, Agile, CI/CD, System Design

PROFESSIONAL EXPERIENCE

Software Engineer | Tango Eye

April 2025 – Present

- Architected and developed a canvas-based store layout system from scratch using Angular and Fabric.js, enabling drag-and-drop configuration of fixtures and product placements.
- Developed frontend architecture for complex UI interactions including zoom, pan, state synchronization, and layout persistence for large-scale configurations across thousands of retail locations.
- Designed and implemented backend APIs for planogram management, including data modelling, schema design, and integration with existing services
- Improved frontend performance by introducing OnPush change detection, lazy loading, signals, standalone components and modular architecture, reducing bundle size and improving rendering efficiency.
- Integrated near real-time store data from external systems to visualize product compliance, placement status, and operational insights.

Team Lead | Tandemloop Technologies Pvt. Ltd.

August 2023 – March 2025

- Led a team of 7 engineers to redesign and rebuild a SaaS platform from scratch, improving scalability and enabling faster feature delivery.
- Drove architectural decisions across frontend and backend, including migration from REST to GraphQL and implementation of multi-tenant architecture.
- Established coding standards, project structure, and development workflows, and conducted regular code reviews to ensure maintainability and quality.
- Managed end-to-end delivery by coordinating with design, QA, and DevOps teams, handling sprint planning, task allocation, and feature releases.

Software Engineer | Tandemloop Technologies Pvt. Ltd.

August 2021 – July 2023

- Revamped a legacy Angular application by rewriting the codebase from Angular 11 to Angular 17 using modern architecture patterns and standalone components.
- Developed core modules including authentication, organization management, role-based access control, and order fulfilment workflows.
- Improved application performance and scalability by restructuring frontend architecture, optimizing data flow, and reducing bundle size.
- Built reusable UI components and standardized data handling patterns to support rapid feature development across multiple SaaS modules.

EDUCATION

Master of Computer Applications (MCA) | University of Madras.

2024

B.Sc. Physics & Computer Science (Dual major) | SASTRA University.

2021
